## Art, Sculpture, Prints and Jewellery

The Art Exhibition, now in its 30th year, offers a unique selection of contemporary painting, sculpture, prints and jewellery from over 80 of Scotland's most established artists along with emerging talent. The Hospice's Centre for Education and Research, boasting stunning views across the Firth of Forth, is the ideal venue to browse the exhibition and buy original art while helping support the work of the Hospice.

Come along to the Friday late night opening and join us for an informal drinks reception as you peruse our collection.

## St Columba's Hospice

Our mission is to improve the quality of life for people with progressive, far advanced diseases while providing support for their families and loved ones. Care and Compassion Matters, our new and exciting five year strategy highlights how we are working towards creating a dedicated space for pre- and post-bereavement support, and the development of an art room where patients and their loved ones can take part in creativity workshops. We will also be taking more of our services out to our patients who wish to be supported to stay at home.

To provide our high levels of specialist care to people we must raise over £8 million every year. By supporting our exhibition you are playing a vital role in helping to secure the future of specialist palliative care in Edinburgh and the Lothians.
